

Dr. Linnfield Laboratories Pvt. Ltd.

Nutrition Based

**NANO TECHNOLOGY DRIVEN
FUTURE FARMING**

Healthy Soil Healthy Plants Handsome Crop

दमदार भूमि जानदार पौधे शानदार फसल

MADE IN INDIA

Manufactured by

Dr. Linnfield Laboratories Pvt. Ltd.

Sultanpur, Ambala City, Haryana (India)

Email: dr.linnlab@gmail.com Customer care: 0172-4014524

We are an associated unit of **HFC (Hindustan Fertilizer Corporation)** deals in Organic Fertilizer Manufacturing (**based on cell burst and Cyst technology a unique state of art without rotting and decomposition of the product**), Nano technology based products, establishing fertilizer plant and Upcoming technology based spray machinery and auto mobile chemicals.

We are manufacturing all agro inputs ranging from Ammonium Polyphosphate, Urea Ammonium Nitrate, Potassium Phosphate, Liquid Zinc, Liquid Amino Acid, Anti-Fungal Sticker Spreaders, Antibiotic Sticker Spreaders, Universal Sticker Spreaders (for better efficacy of Pesticides, Herbicides & Fungicides) and most importantly a complete range of Fertimine Organic Manure which includes Organic Manure Fruit & Vegetable, Organic Manure Cereal, Organic Manure Universal, Organic Manure Lawns & Garden, Organic Manure Seed treatment & germination, Organic Manure Soil Improver, Organic Manure stubble Decomposer, Organic Manure Animal Repellent, Organic Manure Moss, Organic Manure Black pearl and many more since last 20 years. Fertimine is a High end very fine fertilizer made purely from plant roots specially the sugarcane roots.

Our products are approved under **APEDA** and **ISO 9001** and State regulatory bylaws for quality standards, regulatory approvals, and are sold by obtaining marketing license for sale and manufacturing license for production.

We have two manufacturing facilities in the two states, the state of Punjab and the state of Haryana respectively. We can manufacture high quality products in Powder, Liquids and Granules as per the need/demand.

We have deep in roads in the market. We have a very vast dealers & distributors network North India and expanding to Pan India basis.

We are engaged in lot of soil reclamation programme on Hills & deserts and helped in conversion of wastelands to farming lands helping farmers to **produce more and earn more.**

We believe in The Best and we offer our farmers The Best Quality products. We make them achieve all their nutritional needs of soil and crop in minimum span of time with best crop yield and highest possible gains.

1. Fertimine Cereals

100% Pure Root Organic Manure manufactured with Cell n Cyst technology

Application Benefit :

1. Rich in Carbon for healthy soil and plant system.
2. It supplies the total nutrients required for the plant growth.
3. Productivity enhancing yield and soil health with microbial and nutritional balance.
4. This is best product for increase in yield in cereals & Pulses.
5. Mobilizes the calcareous layer in soil and increase soil aeration helping rootzone to develop more for yield.

Doses & Application/Acre basis :

Nursery - 2-5 kg per Acre depending upon the soil type and plants nutritional requirement.

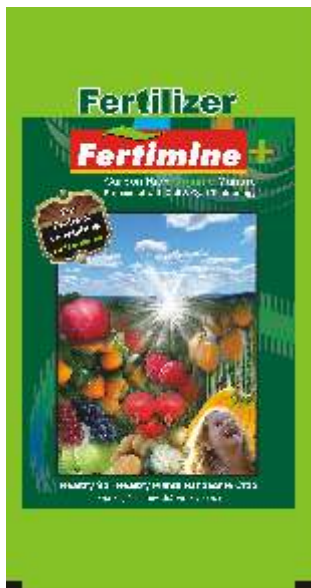

Basal - 10-15 kg with DAP/Urea at the time of soil preparation for planting/acre.

Split - Can be applied before watering @ 2-5 kg/acre depending upon crop.

Packings Available : 5 Kg, 25 Kg

2. Fertimine Fruits & Vegetables

100% Pure Root Organic Manure manufactured with Cell n Cyst technology

Application Benefit :

1. Fertimine is prepared from 100% plant material
2. Rich in Carbon for fruits and vegetables as per the nutritional requirement in specific terms.
3. It supplies the total nutrients required for the plant growth and productivity enhancing yield.
4. Improves soil health with microbial and nutritional balance.
5. Improves the fruit quality and enhances shelf life / keeping quality.

Doses & Application/Acre basis :

Basal - 5 kg/acre with DAP/Urea or 10 kg/acre alone.

Split - 2-5 kg/acre depending upon soil type & crops at 15 days interval.

Packings Available : 1 kg, 5 Kg

3. Fertimine Nursery

Application Benefit :

1. Rich in Carbon with nutrients for Nursery plants.
2. Very effective in urban farming as per the nutritional requirement of pot plants inspecific terms.
3. It supplies the total nutrients required for the plant growth and productivity enhancing yield.
4. Improves soil health with microbial and nutritional balance.
5. Excellent partner for indoor plants/roof top/vertical farming.

Doses & Application/Acre basis :

Seed Bed - Can be applied @2-3 kg/acre as soil dressing.

Seedling - Can be applied as 3-5 kg/acre as broadcast in the nursery fields.

Household Pots: 2-3 teaspoon per pot at 15 days

Packings Available : 1 Kg

100% Pure Root Organic Manure
manufactured with Cell n Cyst technology

4. Fertimine Decomposer

Application Benefit :

1. Its an excellent product for NGT initiatives with future perspectives.
2. Rich in Carbon for decomposing crop residues in the field after harvest of grains. **It decomposes the residue in 10 days after application.**
3. It helps in disintegrating the crop residues in the soil helping plants to get total nutrients required for their growth.
4. Helps in enhancing yield and soil health with microbial and nutritional balance without loss of biomass.
5. Helping farmers in saving chemical fertiliser cost and controlling pollution too.
6. This is a product fits well in GoGreen Initiatives and preserving Nutrients

Doses & Application/Acre basis :

After harvest- 20 Kg/acre applied on the paddy straw after harvesting and tractor ploughing later on watering the field.

Packings Available : 5Kg, 20 Kg

100% Pure Root Organic Manure
manufactured with Cell n Cyst technology

5. Stubble Decomposer (L) 100% Pure Root Organic Manure manufactured with fast decomposing Cell n Cyst technology

Application Benefit :

1. Its an excellent product for NGT initiatives with future perspectives.
2. Rich in Carbon for decomposing crop residues in the field after harvest of grains. **It decomposes the residue in 10-15 days after application.**
3. It helps in disintegrating the crop residues in the soil helping plants to get total nutrients required for their growth.
4. Helps in enhancing yield and soil health with microbial and nutritional balance without loss of biomass.
5. Helping farmers in saving chemical fertiliser cost and controlling pollution too.
6. This is a product fits well in GoGreen Initiatives and preserving Nutrients

Doses & Application/Acre basis :

After harvest- 10Lt/acre mixed with 200-500 Lt water applied on the paddy straw after harvesting and tractor ploughing later on light watering the field.

Packings Available : 5Lt, 10 Lt, 20 Lt

6. Fertimine Animal Repellent 100% Pure Root Organic Manure manufactured with Pheromone Cell n Cyst technology

Application Benefit :

1. Fertimine Repellant is prepared from 100% plant material
2. It provides nutrients to crops and keeps away wild animals damaging crops without killing them, thus saving the annual loss at national level helping GDP growth.
3. It supplies the total nutrients required for the plant growth and productivity.
4. Improves Farmers Economic health with no toxic to animals and increased nutritional balance in crops.
5. Its a unique state of art technology providing nutrients to crop and repelling animals without harming.

Doses & Application/Acre basis :

2kg/acre on covering the boundaries or 5 kg/acre for covering the entire crop area as broadcasting at good foliage condition this will help in getting crop nutrition and safety from animals for a longer duration of 15-20 days. **Best uniform application can be attained by Duster**

Packings Available : 1 kg, 5 Kg

7. Fertimine Moss

100% Pure Root Organic Manure manufactured with Fibres rich in nutrition Cell n Cyst technology

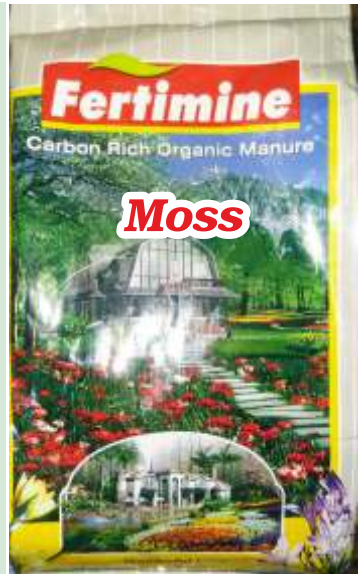

Application Benefit :

1. Fertimine Moss is prepared from 100% plant material
2. It provides nutrients to crops and increases in WHC and conditioning of soil.
3. It supplies the total nutrients required for the plant growth and productivity.
4. Improves soil health with microbial and nutritional balance.
5. Its a unique state of art technology providing nutrients to crops and getting more yields.

Doses & Application/Acre basis :

2-3 Kg/acre on for covering the entire crop area as broadcasting at soil preparation stage. This will help in getting crop **nutrition, water holding capacity and soil conditioning too.**

Packings Available : 500gm, 1Kg

8. Fertimine Soil Improver

100% Pure Root Organic Manure manufactured with Cell n Cyst technology

Application Benefit :

1. Fertimine soil improver is prepared from 100% plant material
2. It provides nutrients to crops and increases in WHC and conditioning of soil.
3. It supplies the total nutrients required for the plant growth and productivity.
4. Improves soil health with microbial and can be a replacement of FYM helping soil health improvement & contamination from Fungi and weed seeds which spreads thru FYM.
5. Its a unique state of art technology providing nutrients to crops and getting more yields.

Doses & Application/Acre basis :

2-3 bags per acre on for mixing the entire crop area as broadcasting at soil preparation stage. This will help in getting crop **nutrition, water holding capacity and soil conditioning too.**

Packings Available : 40 kg

9. Fertimine Kala Moti (Premium)

100% Pure Root Organic Manure manufactured with Continuously Nutrition Release (CNR) Cell n Cyst technology

Application Benefit :

1. Fertimine **Kala Moti Premium** is prepared from 100% plant material
2. It provides nutrients to crops and increases in Plant health and conditioning of soil.
3. It supplies the total nutrients required for the plant growth and productivity.
4. Improves soil health with microbial and nutritional balance.
5. Its a unique state of art technology providing nutrients to crops and getting more yields.
6. Works as Nutritional Reservoir for the crops.

Doses & Application/Acre basis :

5 Kg/acre depending on the soil condition for the entire crop area as broadcasting at any cropping stage. This will help in getting crop **nutrition, plant health conditioning too with constellar technology and best fit under IPM, ICM, INM.**

Packings Available : 1Kg, 5Kg

10. Fertimine Kala Moti Soiler

100% Pure Root Organic Manure manufactured with Cell n Cyst technology

Application Benefit :

1. Fertimine Kala Moti Soiler is prepared from 100% plant material
2. It provides nutrients to crops and increases in Plant health and conditioning of soil.
3. It supplies the total nutrients required for the plant growth and productivity.
4. Improves soil health with microbial and nutritional balance.
5. Its a unique state of art technology providing nutrients to crops and getting more yields.
6. Works as Nutritional Reservoir for the crops.

Doses & Application/Acre basis :

20 Kg/acre with Chemical Fertiliser depending on the soil condition for the entire crop area as basal at land preparation.

This can also be used with seed driller while sowing seeds for better germination effect. This will help in getting crop **nutrition, plant health conditioning too.**

Packings Available : 20Kg

11. Santa Rosa *Sulphur 90% WDG*

Application Benefit :

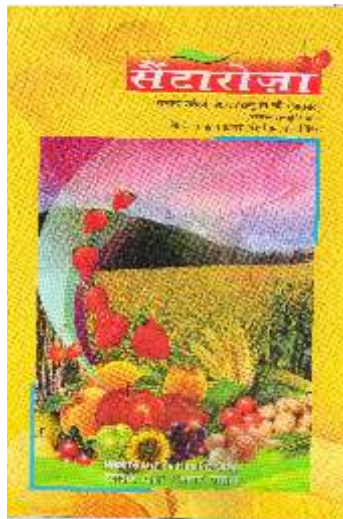

1. This is a special grade sulphur required for plant growth.
2. Contributing soil health in terms of Fertiliser, acaricide and fungicide.
3. This is in purest form and easily absorbed by the plant leaves with less doses saving farmers cost.
4. Helps in improving soil fertility status.
5. This acts a nutrition to crops and soil also.

Doses & Application/Acre basis :

Sowing - 2-2.5 Kg/acre as soil application for nutrition.

Spray - 300 gm/acre in 100-125 lts of water as spray.

Packings Available : 1kg, 3Kg, 5Kg

12. NuTrino *Liquid Growth Component*

Application Benefit :

1. Dense coloured product with 10 types of rich amino acids very effective for spray on all crops.
2. It helps crop to produce more flowers, converting flowers to form fruits and enhancing fruit sizes.
3. It gives yield in terms of quantity and quality both.
4. It enhances shelf life and keeping quality of fruits.
5. It is effective in all modes of farming like open, polyhouse, indoor, Drip etc.

Doses & Application/Acre basis :

Seed Treatment- 1ml/kg seed.

Foliar spray - 2-3 ml/ltr water on all crops.

Drip - 0.4-0.6 ml/ltr water in case of polyhouse and indoor plants as root therapy.

Packings Available : 100ml, 250ml, 500ml, 1 Ltr, 5 Ltr

13. Nano Znoxet EDTA ZN 12% Nano tech based

Application Benefit :

1. Nano particle based product with a composition of 12%EDTA.
2. Helpful in fulfilling crop nutrients requirement.
3. Fulfilling the gap of Zinc deficiency in plants.

Doses & Application/Acre basis :

Foliar spray - 0.5-1 gm/lit water as spray depending on crop and soil types.

Drip - 0.5gm/lit water in case of polyhouse and indoor plants as root therapy.

Packings Available : 50gm, 100gm, 250gm, 500gm, 1Kg

14. Nano Frammin EDTA FE 12% Nano tech based

Application Benefit :

1. Nano particle based product with a composition of 12%EDTA
2. Helpful in fulfilling crop nutrients requirement.
3. Fulfilling the gap of Ferrous deficiency in plants.

Doses & Application/Acre basis :

Foliar spray - 0.5-0.7 gm/lit water as spray depending on crop and soil types.

Drip - 0.4gm/lit water in case of polyhouse and indoor plants as root therapy.

Packings Available : 50gm, 100gm, 250gm, 500gm, 1Kg

15. Nano Boron - Dibro

EDTA B 20% Nano tech based

Application Benefit :

1. Nano particle based product with a composition of 20%EDTA
2. Helpful in fulfilling crop nutrients requirement
3. Fulfilling the gap of Boron deficiency in plants.
4. Helps in saving fruits from sunburn or cracking

Doses & Application/Acre basis :

Foliar spray - 0.3-0.5 gm/ltr water as spray depending on crop and soil types.

Drip - 0.4gm/ltr water in case of polyhouse and indoor plants as root therapy.

Packings Available : 50gm, 100gm, 250gm, 500gm, 1 Kg

Dibro
13-14.5%
Di-Sodium Tetra Borate Penta Hydrate
Multipurpose Technical Grade

Technical Specifications :

13-14.5%

250 Grams Batch No. : B-108
Packing Date : Feb. 2020
MRP (incl. Taxes) : 318.00

Dr. Limfield Laboratories Pvt. Ltd.
Amherst, Rajasthan, Prantah, India
Ph. : 0793 6040033, E mail : drlimfield@gmail.com

16. Rheobor Liquid Calcium Boron

Application Benefit :

1. Nano particle based product with a composition of Calcium and Boron
2. Helpful in fulfilling crop nutrients requirement
3. Fulfilling the gap of deficiency in plants.
4. Affects the Fruit size and colour positively.
5. Helps in increasing the fruit shelf life and skin for prolong storages.

Doses & Application/Acre basis :

Foliar spray: 3-5ml/ltr water as spray depending on crop and growth stages.

Drip Irrigation: 1-2 ml/ltr water on fruit & vegetable crops

Packings Available : 250ml, 500ml, 1 Lt, 5 Lt, 10 Lt

Calcium Boron
Rheobor

Batch No. : B-207
Mfg Date : Feb. 2020
MRP : ₹ 960.00
(incl. Taxes)

17. FixQR2000 *Nano tech Sticker spreader*

Application Benefit :

1. A product with a characteristic feature of penetrating deeper in the plant parts.
2. Helping the product to perform in a much effective way for suppressing the infestation.
3. Increases the efficacy of the product sprayed on crop.
4. A perfect partner for the effective spray on crops.
5. A Pure Herbal product with characteristic features.

Doses & Application/Acre basis :

Foliar spray - 0.3-0.5 ml/ltr water as spray depending on crop and growth stages **Or** 5ml/15 Lt of water.

Drip - 0.4ml/ltr water in case of polyhouse and indoor plants as root therapy.

Packings Available : 50ml, 100ml, 250ml, 500ml, 1 Lt

18. FixQR3000 *Nano tech Sticker spreader*

Application Benefit :

1. A product with antibiotic characteristic feature of penetrating and spreading deeper in the plant parts.
2. Helping the product to perform in a much energetic way for suppressing the infestation by killing the fungal spores in the crops.
3. Giving a clean system to plants for growth.
4. A safe product for all in the biosphere.
5. Product with ultimate features as a fungicide and Spreading characters.

Doses & Application/Acre basis :

Foliar spray - 0.7-1.0 ml/ltr water as sticker/spreader spray depending on crop and growth stages. **Or** 30ml/tank of 15 Lt water as fungicide with any oproduct on any crop at any stage.

Drip - 0.5ml/ltr water in case of polyhouse and indoor plants as root therapy.

Packings Available : 50ml, 100ml, 250ml, 500ml, 1 Lt

19. FixQR5000 *Nano tech Sticker spreader*

Application Benefit :

1. A product with antibiotic characteristic feature of penetrating deeper in the plant parts.
2. Helping the product to perform in a much energetic way for suppressing the infestation by killing the bacterias.
3. Giving a clean system to plants for growth.
4. Gives a new life to plant for better fruiting.

Doses & Application/Acre basis :

Foliar spray - 0.7-1.0 ml/lit water as sticker/spreader spray depending on crop and growth stages. **Or** 30ml/tank of 15 Lt water as bactericide or viricide with any product for curing mosaic at 5-7 days interval.

Drip - 0.5ml/lit water in case of polyhouse and indoor plants as root therapy.

Packings Available : 50ml, 100ml, 250ml, 500ml, 1 Lt

1 Ltr.	Batch No. :	S-765
	Packing Date :	Feb. 2020
	MRP (incl. Taxes) :	₹ 1900.00

Mfg. & Packed By

20. OLO *Organic Oil Repellent for Insect Pest on Crops*

Application Benefit :

1. This is a special herbal product required for plant growth.
2. Keeps plant free from the insect pest causing diseases.
3. This works on restricting feeding action of insects.
4. This is in purest form and easily absorbed by the plant leaves with less doses.
5. This keeps environment free from any residue on the plants, humans, environment.

Doses & Application/Acre basis :

Foliar spray - 2.0-3.0 ml/lit water as spray depending on crop and growth stages **Or** 25-30 ml/Tank of 15 Lt water

Packings Available : 50ml, 100ml, 250ml, 500ml, 1 Lt

21. Rapido Nano Liquid Nitrogen Technical in ammoniacal form

Application Benefit :

1. This is a special product required for plant growth and keeping plants in healthy form.
2. This is in purest form and easily absorbed by the plant leaves with less doses.
3. Helping plants to grow in a healthy manner and producing good quality grains and high yields.
4. Safe for all ie soil, plants, ecology.
5. Less application and more benefit a storage House for the plant as it allows nutrition to plants for a longer duration.

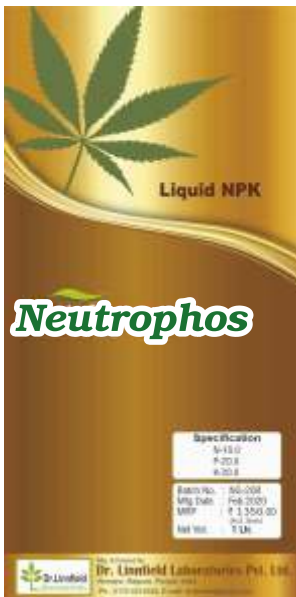

Doses & Application/Acre basis :

Foliar spray - 2-2.5 ml/lit water as spray depending on crop and growth stages **Or** 30-40 ml/15 lt of water **Or** 500ml/acre as soil application

Drip - 0.6ml/lit water in case of polyhouse and indoor plants as root therapy.

Packings Available : 250ml, 500ml, 1 Lt, 5 Lt, 10 Lt

22. Neutrophos Liquid Urea Phosphate

Application Benefit :

1. This is a special product required for plant growth and keeping plants in healthy form.
2. This is in purest form and easily absorbed by the plant leaves with less doses.
3. Helping plants to grow in a healthy manner and producing good quality grains and high yields.
4. Helps in making food speedily thru leaves
5. This provides strength to the fruit crops giving more yield.

Doses & Application/Acre basis :

Foliar spray - 2 ml/lit water as spray depending on crop and growth stages **Or** 30 ml/15 lt of water

Drip - 0.6ml/lit water in case of polyhouse and indoor plants as root therapy.

Packings Available : 250ml, 500ml, 1 Lt, 5 Lt, 10 Lt

23. Snow Green Liquid Potassium Nitrate

Application Benefit :

1. This is a special product required for plant growth and keeping plants in healthy form.
2. This is in purest form and easily absorbed by the plant leaves with less doses.
3. Helping plants to grow in a healthy manner and producing good quality grains and high yields.
4. This helps in strengthening the plant system with efficient utilisation of required resources.

Doses & Application/Acre basis :

Foliar spray - 2 ml/ltr water as spray depending on crop and growth stages **Or** 30 ml/15 ltr of water

Drip - 0.6ml/ltr water in case of polyhouse and indoor plants as root therapy.

Packings Available : 250ml, 500ml, 1 Lt, 5 Lt, 10 Lt

24. Cal Ride Liquid Calcium Chloride

Application Benefit :

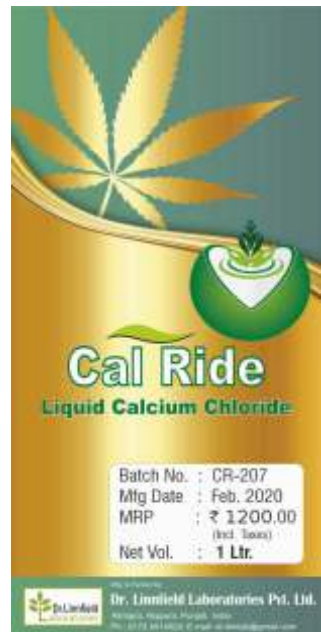

1. This is a special product required for plant growth and keeping plants in healthy form.
2. This is in purest form and easily absorbed by the plant leaves with less doses.
3. Helping plants to grow in a healthy manner and producing good quality grains and high yields.
4. This helps in increasing the duo need of plant in terms of nutrients and food translocation within the plant system.

Doses & Application/Acre basis :

Foliar spray - 2 ml/ltr water as spray depending on crop and growth stages **Or** 30 ml/15 ltr of water

Drip - 0.5ml/ltr water in case of polyhouse and indoor plants as root therapy.

Packings Available : 250ml, 500ml, 1 Lt, 5 Lt, 10 Lt

25. NuTrifit

Nano Liquid Nitrogen Technical in ammoniacal form

Application Benefit :

1. This is a special product required for plant growth and keeping plants in healthy form.
2. This is in purest form and easily absorbed by the plant leaves with less doses.
3. Helping plants to grow in a healthy manner and producing good quality grains and high yields.
4. This helps in increasing the duo need of plant in terms of nutrients and food translocation within the plant system.
5. This provides the basic food to plants and further nurturing with the nutrition needs of the plants.

Doses & Application/Acre basis :

Foliar Spray: 2-3 ml / Lt water as foliar spray for all crops depending on crop stages and type of crops

Drip - 0.6ml/Lt water in case of polyhouse and indoor plants as root therapy.

Packings Available : 250ml, 500ml, 1 Lt

26. RipeOn

PGR Ethylene

Application Benefit :

1. This is a special product required for plant growth and keeping plants in healthy form.
2. This is in purest form and easily absorbed by the plant leaves with less doses.
3. Helping fruits to grow in a healthy manner and producing good quality juice and high yields.
4. This helps in increasing the duo need of plant in terms of nutrients and food translocation within the plant system enhancing colours.
5. This provides the basic food to plants and further nurturing with the nutrition needs of the plants and helps in complete maturing.
6. It helps in checking the rotting issue in fruits and increases shelf life of the fruits.

Doses & Application/Acre basis :

Foliar Spray: 2-3 ml / Lt water as foliar spray for all crops depending on crop stages and type of crops

Packings Available : 250ml, 500ml, 1 Lt

27. Vapo Ripe Vapour ripening

Application Benefit :

1. This is a special product required for ripening of fruits in the storage.
2. This is in purest form and easily absorbed by the skin with less doses.
3. Helping Fruits in Uniform coloring and safe to all.
4. This helps in uniform ripening of the fruits with no toxicity as compared with Carbide which is highly toxic.
5. This increases the shelf life of the fruits and the fruit decay is delayed.
6. This is safe and is more economical for farmers.

Doses & Application/Acre basis :

Foliar spray - 10 ml/lit water as fumigation on the stored fruits for ripening.

Packings Available : 250ml, 500ml, 1 Lt

28. Fruit Dip PGR Ethylene

Application Benefit :

1. This is a special product designed for ripening of fruits in the storage.
2. This is in purest form and its application is easy for the users.
3. Fruits are dipped in the solution and kept for drying.
4. This helps in uniform ripening of the fruits with no toxicity as compared with Carbide which is highly toxic.
5. This increases the shelf life of the fruits and the fruit decay is delayed.
6. This does not need any closed chamber, is more economical and safe for farmers.

Doses & Application/Acre basis :

Foliar spray - 5 ml/lit water as spray after harvesting of crop before storing

Packings Available : 250ml, 500ml, 1 Lt

29. Rozar

Calcium Ammonium Nitrate

Application Benefit :

1. This is a special product required for plant growth and keeping plants in healthy form.
2. This is in purest form and easily absorbed by the plant leaves with less doses.
3. Helping plants to grow in a healthy manner and producing good quality grains and high yields.
4. This helps in strengthening the plant system with efficient utilisation of required resources.

Doses & Application/Acre basis :

Foliar spray - 2 ml/lit water as spray depending on crop and growth stages **Or** 30 ml/15 Lt of water

Drip - 0.6ml/lit water in case of polyhouse and indoor plants as root therapy.

Packings Available : 250ml, 500ml, 1 Lt, 5 Lt, 10 Lt

30. Oxydanyl

Plant Oxydiser

Application Benefit :

1. This is a special product required for plant growth and keeping plants in healthy form.
2. This is in purest form and easily absorbed by the plant leaves with less doses.
3. Helping plants to grow in a healthy manner free from diseases and proper growth with oxidising effect.
4. This helps in increasing the duo need of plant in terms of nutrients uptake and food translocation within the plant system.
5. This provides the basic foundation of plants in terms of health and sanitisers.

Doses & Application/Acre basis :

Foliar Spray: 2-3 ml / Lt water as foliar spray for all crops depending on crop stages and type of crops

Root Treatment: 5ml/lit water can be used as drenching for treating the rootzone infested with various fungi.

Seed Treatment: 10ml/lit water helps in keeping the seeds free from inoculum of fungi & bacteria

Drip - 0.1ml/lit water in case of polyhouse and indoor plants as root therapy.

Packings Available : 250ml, 500ml, 1 Lt, 5 Lt, 10 Lt

31. APP Green *Liquid Phosphorus*

Application Benefit :

1. This is a special product required for plant growth providing N and P in Poly form for long lasting effect.
2. This is in purest form and easily absorbed by the plant leaves with less doses leaving no residue in soil.
3. Helping plants to grow in a healthy manner and producing good quality grains and high yields.
4. This helps in increasing the duo need of plant in terms of nutrients and food translocation within the plant system by P at later stage.
5. This provides the basic food to plants and further nurturing with the nutrition needs of the plants.

Doses & Application/Acre basis :

Foliar spray - 2 ml/ltr water as spray depending on crop and growth stages **Or** 30-40 ml/15 Lt of water **Or** 500ml-1000ml/acre as soil application

Drip - 0.4-0.6 ml/ltr water in case of polyhouse and indoor plants as root therapy.

Seed Treatment: 1ml/ltr water for treating seeds will effect better germination.

Packings Available : 250ml, 500ml, 1 Lt, 5 Lt, 10 Lt

AMMONIUM POLYPHOSPHATE
(10-34-0) (Liquid)

Nitrogen	10%

32. KP2 *Pottassium , Phosphorus*

Application Benefit :

1. This is a special product required for plant growth providing P and K in Poly form for long lasting effect.
2. This is in purest form and easily absorbed by the plant leaves with less doses leaving no residue in soil.
3. Helping plants to grow in a healthy manner and producing good quality grains and high yields.
4. This helps in increasing the duo need of plant in terms of nutrients and food translocation within the plant system by P&K at later stage.
5. This provides the basic food to plants and further nurturing with the nutrition needs of the plants.

Doses & Application/Acre basis :

Foliar spray - 2-2.5 ml/ltr water as spray depending on crop and growth stages **Or** 30-40 ml/15 Lt of water **Or** 500ml/acre as soil application

Drip - 0.4-0.6 ml/ltr water in case of polyhouse and indoor plants as root therapy.

Packings Available : 250ml, 500ml, 1 Lt

33. Teeka

100% Pure Root Organic Manure Manufactured with Cell n Cyst technology

Application Benefit :

1. Helps in getting germination above 95%
2. Helps in getting fast germination with vigor

Seed Rate - 5.0-6.0 kg/acre for good yield & healthy crops.

Packings Available : 6 Kg

Few Testimonials in various crops and location

हमेशा आईएसओ 22241 के निर्देशानुसार डिजाइन और निर्मित उपकरणों का उपयोग करें।

- हमेशा समर्पित और स्वच्छ उपकरणों का उपयोग करें
- केवल एडब्लू® टैंक में ही एडब्लू डालें। वितरण की जाने वाली नोज़ल और टैंक दोनों स्पष्ट रूप से चिह्नित करें।
- एडब्लू® उपकरणों को हमेशा गंदगी या धूल से संरक्षित रखें
- एडब्लू® वितरित करने के दौरान विशेष कपड़े पहनना आवश्यक नहीं है
- ज्यादा मात्रा में एडब्लू का रखरखाव करते समय उसके फैल जाने का यदि खतरा हो, तब रक्षात्मक कपड़े पहनने का सुझाव दिया जाता है
- किसी मामले में यदि एडब्लू® के कंटेनर गरम हो जाएं तब उन्हें पानी से ठंडा किया जा सकता है
- यदि टैंक क्षतिग्रस्त हो जाता है तब सहायता के लिये संपर्क करें

ध्यान दें: एडब्लू® का रखरखाव करने से पहले हमारी वेबसाइट से एमएसडीएस (सामग्री की सुरक्षा डाटा शीट) और और टीडीएस (तकनीकी डाटा शीट) डाउनलोड करें या हमें care@bluebasicindia.com ईमेल पर संपर्क करें:

- 35 डिग्री से ऊपर और -11 डिग्री से नीचे तापमान पर एडब्लू® खुला मत रखें
- धूप या सूर्य की रोशनी में एडब्लू® मत रखें
- डीजल टैंक में एडब्लू® मत भरें
- एडब्लू® टैंक में कभी भी ईंधन मत भरें
- कभी भी पानी या अन्य पदार्थों के साथ एडब्लू® मिश्रित मत करें, इस बात का विशेष ध्यान रखें कि एडब्लू® के साथ डीजल मिलाकर उसे दूषित मत करें
- एडब्लू® को फर्श की सतह पर मत गिरायें क्योंकि इससे सतह फिसलन भरी हो सकती है।
- एडब्लू® कंक्रीट या ईटों को नुकसान पहुंचा सकता है। यदि किसी कारण एडब्लू® फर्श सतह पर फैल गया है तब तुरन्त उसे पानी से साफ कर दें।
